OUTDOOR TOYS FOR CHILDREN
TRAMPOLINES 2008

www.bergtoys.com

Playing is fun! Playing outdoors is huge fun.

We think it's important that kids play outside, seek adventures and discover the world around them. We think it's important that they find exciting things to do, and that they are totally free to run around. What we offer kids is pure fun. BERG Toys has grown along with our range of go-karts to become one of the biggest players in the outdoor toy market, including trampolines.

Trampolining is a great opportunity for kids to play outside in their own garden. It encourages physical, emotional, creative and social development. Trampolining is a wonderful outlet for your child's fantasy, creativity and self-expression.

Kids are full of enthusiasm and imagination, and have little sense of danger. For this reason, BERG Toys regards safety as paramount. All BERG trampolines are therefore built with a sturdy frame, an extra wide protective edge and strong springs, so that you can feel confident with its build quality. Furthermore, every purchase of a BERG Toys trampoline comes with a free Safety DVD with instructions that help you to make trampolining even safer.

Enjoy the fun that your kids will have, just as we enjoy knowing that our trampolines are just right for your kids!

Why BERG:

- ✓ The safest choice
- ✓ Highest quality
- ✓ Pure fun
- ✓ For good health and social skills

Page 15

Why is BERG 'the safest choice'?

Trampolining is fun and healthy!

Even NASA claims that trampolining is 68% more effective than jogging for burning off calories. It reduces stress, improves circulation and improves overall fitness. Safety is also paramount, and BERG Toys is here to lend a hand. That's why it's right to say that BERG is

'the safest choice'!

1 Technology

BERG Toys' team of engineers are always working to find the best available safety features. These can be found in the protective edge, springs and frame. A BERG trampoline means that you are always guaranteed the most effective safety features on your trampoline.

2 Above & beyond EU standards

The trampolines of BERG Toys are tested by TÜV and AIB Vincotte inspectors. But at BERG Toys we go even further. We have taken the initiative to work at European level to further tighten the safety standards and offer our expertise to the European Union as a member of the 'CEN' working group engaged in drawing up a new standard for privately-owned garden trampolines. For years, BERG Toys has stressed the importance of only one child at a time using the trampoline. To encourage safe practice when trampolining, BERG Toys has developed the BERG Tattoo. This unique trampoline has a game printed on the jumping mat which encourages children not to jump on the trampoline at the same time.

3 Testing lab

Due to the strict standards that BERG Toys sets itself, it has set up its own testing lab in addition to the European testing centres. It applies various leverage and jitter tests involving weights of as much as 970 kg to simulate use under the most extreme conditions. We also work with physiotherapists, testing centres and sports federations in order to maintain our expertise at the highest level and to test our products.

4 Instructions

Apart from the product itself, it is the user who will largely determine the ultimate safety of the trampoline. By assembling, maintaining and using the product correctly you can eliminate the most significant risks to safety. With every BERG trampoline we include clear safety and assembly instructions, as well as a free DVD which provides step-by-step instructions for learning to use your trampoline safely.

5 Guaranteed service

Parts suffer wear and tear. BERG Toys guarantees that any part can be ordered separately for up to five years after production of the product in question has stopped. Very few other manufacturers can offer this service. This guarantees you years of enjoyment and is a unique guarantee amongst trampoline manufacturers.

In conclusion: BERG Toys is constantly applying the latest technology and skills to make trampolining as safe as possible and sets the standard for the entire trampoline industry.

That's why BERG is.....'the safest choice'!

Free Safety DVD!
With the purchase of any BERG trampoline.
For BERG Toys the child's safety is paramount.

What should you think about when making a purchase?

Download the checklist from [WWW.BERGTOYS.COM](http://www.bergtoys.com)

Guide to buying a trampoline

Trampolines are hugely popular. Most are circular in shape and consist of a frame, protective edge, springs and a jumping mat. However, not all trampolines are the same! What you need is the optimal combination of price, safety and durability.

When buying a trampoline you should consider some important points when making your choice:

- A.** Consider who you are buying the trampoline for and whether you can supervise play if the trampoline is being used by a child.
- B.** Check that there is enough room to be able to situate the trampoline safely. There must be at least one and a half metres of free space around the trampoline, or a half metre if your trampoline is supplied with a safety net. Is there enough headroom above the trampoline?
- C.** Check whether the trampoline can be placed on a level, soft surface.

1 Play safe!

In itself, a trampoline is neither safe nor unsafe. It is how you use it that determines how safe it is. Therefore you should always carefully read the instructions on the safety instructions of a BERG trampoline. They include information such as the fact that only one person at a time may use the trampoline and may not perform advanced acts such as somersaults. Your safety is in your own hands.

2 Frame

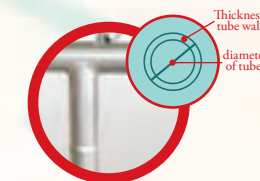

It is important for both the interior and exterior of the frame to be galvanised (i.e. coated with a rustproof layer). This increases the durability of the trampoline. The greater the diameter and thickness of the tube the greater the quality of the trampoline frame. The better the quality, the more durable and safe the trampoline will be.

3 Protective edge

The protective edge is essential for the safety of the trampoline. The thicker the padding and the wider the protective edge, the safer the trampoline. The protective edge not only provides a generous overlap over the springs, but also more than covers the edge of the frame of the trampoline. It is also important to use the right materials: a padding consisting of 'closed-cell-foam' will keep out any moisture.

4 Springs

A double-cone spring ensures optimal firm comfort for jumping. 'Double cone' means that the spring is

The frame of the BERG Champion & BERG Elite is extra thick. That's why BERG Toys can give you a full 5-year guarantee.

The jumping mat lets water pass through it. The springs are attached to the jumping mat by triangular eyes and are stitched securely as many as 8 times.

For extra safety, the protective edge of all BERG trampolines has a wide overlap of 10-12 cm longer than the springs.

The protective edge of BERG trampolines is held safely in place with elastic.

BERG springs are double coned in shape and constructed of high quality resilient sprung steel.

thicker in the middle than at either end, so that the power of the spring is better distributed. BERG Toys leads the way in developing spring technology and have designed the 'Goldspring' – a conical form that helps build up the spring energy gradually, so that that the forces on the body are significantly reduced. The jumper can jump higher and more calmly and comfortably. Finally, the durability of the springs is determined by galvanisation. The thread of the spring can be galvanised on the outside after it has taken shape, or on the inside and outside before it takes its shape.

5 Jumping mat

The triangular eyes are stitched securely to the jumping mat. The more stitches, the safer and more durable the jumping mat is. The eyes on a BERG jumping mat are securely stitched as much as 8 times. In addition it is also important that we clearly mark the centre of the jumping mat as this indicates the premium and safest jumping point to the child.

6 Quality marks

BERG trampolines are all approved by TÜV and AIB Vincotte according to current standards.

7 Guarantee

The quality of BERG trampolines is excellent. An investment in such a quality trampoline will guarantee years of carefree, fun trampolining. Furthermore, BERG guarantees to supply parts for a further five years.

www.bergtrampoline.com

BERG Favorit

The right balance between safety, durability and price

Extra safe due to high quality protective edge

The protective edge of the Favorit is 36 cm wide. This wide overlap ensures that the springs are safely covered. This makes the trampoline safe from getting caught between the springs and softens any fall on the tubular frame. The material used is bisonyl, which guarantees years of durability.

Extra durable thanks to 8 levels of stitching.

The springs are attached to the jumping mat by triangular eyes that are stitched 8 times. This makes the trampoline solid, safe and longer lasting.

Optimal ease of use thanks to spring brackets

The spring brackets ensure that when the trampoline is lifted, the legs cannot fall out. In other words, the trampoline can be constructed, used and moved with ease and extra safety.

Rustproof due to its galvanised frame

The frame of the Favorit is galvanised on both the outside and inside, making the trampoline extra durable.

BERG Champion

Fantastic jumping comfort.
Optimum safety and durability.

Extra wide and long protective edge

The protective edge for the Champion is extra wide (38 cm) and extra thick (30 mm). This gives the Champion even better protection against getting stuck and will help to cushion any fall. The overlap is extra long, so that the trampoline has an elegant, clean look.

Extra durable thanks to 8 levels of stitching

The springs are attached to the jumping mat by triangular eyes that are stitched in place 8 times over. This makes the trampoline solid, safe and long lasting.

Jump higher and more safely thanks to Goldspring

The goldspring is a new and unique spring from BERG Toys which gradually builds up the energy in the spring. It means that the forces exerted on the body are significantly reduced. This means you can jump higher, more safely and in more comfortably.

Optimal ease of use thanks to spring brackets

The spring brackets ensure that when the trampoline is lifted, the legs cannot fall out. In other words, the trampoline can be constructed, used and moved with ease and extra safety.

Extra strong rustproof frame

The frame is 2 mm thick and thanks to galvanising on the inside and outside of the frame, it is rustproof, making the trampoline even more durable.

The BERG EazyStore

Collapsible: quick and easy to put away

The BERG EazyStore can fit almost any garden. Its rectangular shape means it can be easily located in the corner of a garden. It is simple and easy to dismantle and store away. Kids can spend the day jumping and in the evening, the trampoline can be stored against the wall or in the garage.

Extra Safety

Safety net

Extra safe, optimal looks and comfort. Super-quick assembly.

BERG Toys advises you to always use a trampoline with a safety net. This way you can practice jumping in safety, without any risk of falling off the trampoline. BERG Toys has successfully developed a new safety net that unites several safety requirements into 1 product! BERG Toys offers a safety net with all its circular trampolines.

1. Simple to enter and exit, yet always enclosed during use

The BERG safety net combines optimal comfort for entering and exiting with the assurance that the net cannot be accidentally left open during use. You can quickly and simply get off the trampoline and clamber back on without any risk of falling through the opening in the net.

2. Optimal strength of net combined with excellent looks

A safe net is strong, wear-resistant and durable. BERG Toys uses a special net that combines an excellent view from inside to the outside, and vice versa, with optimal strength and durability.

3. Quick and easy assembly, but also strong

Thanks to the specially-developed assembly brackets it couldn't be easier to erect the safety net around a BERG trampoline, whilst guaranteeing optimal strength whilst in use.

Art.No.	Model	Dia meter	Price
35.71.09	Safety net	9ft	£ 160,00
35.71.11	Safety net	11ft	£ 175,00
35.71.12	Safety net	12.5ft	£ 185,00
35.71.14	Safety net	14ft	£ 199,00
35.71.15	Safety net	15ft	£ 245,00

4. Extra protection around the poles

A thick layer of foam around the poles of the safety net ensures that the jumper is also protected against the poles.

Frame net

The frame net ensures extra safety so that children and pets cannot crawl under the trampoline. The frame net is simple to attach.

Art.No.	Model	Dia meter	Price
35.80.09	Frame net	9ft	£ 42,00
35.80.11	Frame net	11ft	£ 47,00
35.80.12	Frame net	12.5ft	£ 52,00
35.80.14	Frame net	14ft	£ 57,00
35.80.15	Frame net	15ft	£ 62,00

The frame net fits all circular BERG trampolines, even those that have not been lowered.

Tattoo

The only trampoline with a games mat

You want to spend as long as possible on the trampoline, but those around you will do anything to have their turn as quickly as possible. They will try to get you to perform the most difficult jumps.

The BERG Tattoo trampoline is therefore ultimately a trampoline game for everyone to enjoy – boys and girls, young and old, experienced or novice jumpers! The Tattoo game is for 2-10 players from the age of 6 upwards.

Most trampolining accidents by far are caused by more than one person jumping at the same time on a trampoline. BERG toys have stressed for years the importance of only allowing one child at a time to jump. To encourage children to play safe, BERG Toys has developed the BERG Tattoo.

The BERG Tattoo jumping mat is unique in the world of trampolining, and BERG Toys owns the exclusive patent.

For an explanation of symbols, see page 15.

Want a BERG Tattoo on your trampoline?

The BERG Tattoo jumping mat is available separately for all BERG trampolines with a diameter of 430 cm.

Accessoires

Berg trampoline covers

Trampoline covers available in all trampoline sizes. With 5 extra large water drainage channels. Across the whole cover to ensure that any rain water drains off quickly. The 'Extra' cover is made of high quality materials.

Illustration of the 'Extra' cover

Anchor set

The anchor set ensures that the trampoline remains firmly rooted to the ground. We advise the use of an anchor set in the case of a lowered trampoline, so that the trampoline can't move from the hole dug for it.

Ladder

The child-friendly ladder has firm, robust steps to stop you from slipping off.

Guarantee

BERG trampolines are excellent quality. We guarantee you years of carefree fun on our trampolines. In fact, we offer you two kinds of guarantee:

1. Performance guarantee

A performance guarantee guarantees the functional use of the trampoline. The table below indicates the length of the guarantee.

Model	Guarantee			
	Frame	Protective edge	Jumping mat	Springs
BERG Favorit	5 year	2 year	2 year	2 year
BERG Champion	10 year	2 year	2 year	5 year
BERG Eazystore	5 year	2 year	2 year	5 year
BERG Elite	10 year	5 year	5 year	5 year

*other guarantee periods apply to the public recreation sector, see separate leaflet

The safety net, frame net and other accessories are guaranteed for 1 year. Parts susceptible to wear and tear (e.g. elastic) are not guaranteed.

2. Five-year service guarantee

A service guarantee is a guarantee that you can continue to order any spare part from BERG Toys for no less than five years after production of the product has ceased. Thanks to this unique guarantee, BERG Toys offers you the opportunity enjoy your trampoline for many years after your purchase.

For more information about guarantee check our website www.bergtoys.com

Most frequently-asked questions

- How safe is trampolining?**
A trampoline is as safe as the way in which you use it. Before using your BERG trampoline always carefully read the instructions on the safety **instructions**. We **recommend** that only one person at a time may jump on the trampoline, and **advanced acts such as somersaults** should not be attempted. We also recommend that you purchase a safety net with trampoline.
- What is the difference between the cheaper trampolines and a BERG trampoline?**
At first sight all trampolines look the same. However, if you check the seven elements in the buying guide, then you can be assured that you have bought a safe and durable trampoline.
- Can the BERG trampoline also be lowered below ground level?**
Yes, almost all BERG trampolines can be lowered below ground level. For instructions, check our website: www.bergtoys.com.
- Can I use the trampoline even if there is frost or if it's raining?**
Yes, you can use the trampoline in freezing weather. However, if the mat is wet, and therefore slippery, BERG Toys strongly recommends that you don't use the trampoline.
- Is it very difficult to put the trampoline together?**
It is not difficult at all to put a BERG trampoline together. With two people on the job, you can have a trampoline ready for use in just half an hour.
- If anything gets damaged, can I get spare parts?**
BERG Toys is proud of the importance it attaches to providing spare parts and its parts service. Parts are usually available for at least five years after purchase of the trampoline.
